

Designtec, Take Back - End of Life, Policy

At Designtec Commercial Furniture we have a successful system that provides our clients with a 'Take Back - End of Life - Policy'. When the Workstations life is at end, we offer our clients a service (costs apply) to take the Workstations away for recycling or reuse.

1. Reuse

"The finest form of recycling is reuse".

Designtec Commercial Furniture manufactures office furniture and manages fit out for clients. We facilitate our clients in dynamically reusing their assets as opposed to the costly and environmentally irresponsible habit of throwing out the old and buying new.

2. Resale

If our client has no immediate or foreseeable requirement for office furniture or fit out we put those assets to market in an attempt to extend their operational life. Multi-level selling platforms including traditional and online auctions allows for the highest possible financial return as well as providing a large volume option. Our process includes meticulous and transparent reporting for our clients. We don't predict the outcome but we guarantee the process.

3. Recycle

In circumstances where no interest is shown from the market, we engage our split-waste recycle approach. This results in maximisation of all recyclable components.

Take back service provider & Recyclers:

- Hazelmere Resource Recovery Park - EMRC
- Wanneroo Metal Recycling
- Instate Waste Management
- SITA Australia - Resource Recovery, Recycling and Waste Management
